

This report covers flu surveillance activities for the 28 counties that comprise Health Service Region 8: Atascosa, Bandera, Bexar, Calhoun, Comal, Dewitt, Dimmit, Edwards, Frio, Gillespie, Goliad, Gonzales, Guadalupe, Jackson, Karnes, Kendall, Kerr, Kinney, La Salle, La Vaca, Maverick, Medina, Real, Uvalde, Val Verde, Victoria, Wilson, and Zavala.

Flu Activity:

Compared to last week, flu activity in the region is about the same. Eighteen counties submitted reports this week. Of the counties that reported, 13 counties reported influenza-like-illness. Ten counties reported flu A by rapid test, and eight counties reported both flu A and flu B by rapid test.

Pediatric Deaths:

No pediatric deaths have occurred in Region 8 this season. Statewide, there have been two influenza-associated pediatric deaths this season, both of which occurred during week 49.

Institutional & School Outbreaks

An increase in flu activity has been detected in several areas of the state. Several outbreaks of flu and flu-like-illness have been reported throughout the state in schools and institutions. Parents of school-aged children have been encouraged to keep any child with symptoms home until the child is fever-free without the use of fever-reducing medication for 24 hours.

Antiviral Resistance

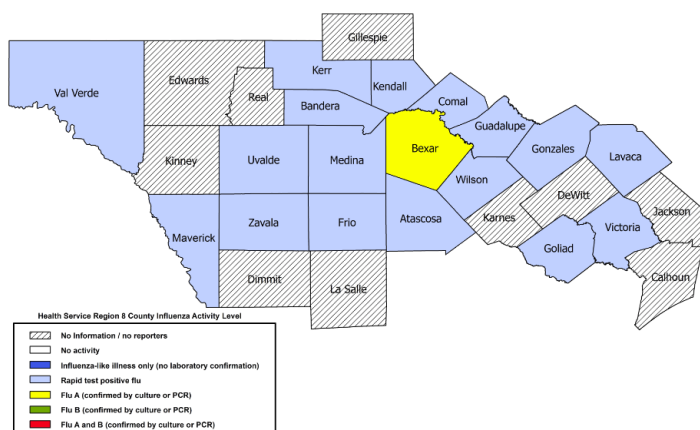

No antiviral resistant flu reported.

Variant Influenza Viruses

No variant or novel influenza viruses have been detected in Texas.

Highlighted areas indicate the highest level of influenza activity detected by county.
